Authentic Sound

VIFA

—

Authentic sound has been the soul of the Vifa brand ever since we started in the early 1930's in Denmark. Introducing several innovative technologies, Vifa soon became a preferred supplier of loudspeaker components for many well-known high-end brands and kept that position into this century.

Based on this proud heritage, we started launching our own series of wireless audio products in 2014. Merging our technical expertise with a functional and aesthetical approach based on the Nordic design tradition, we have named the series after the Nordic capitals. Each and every audio product is intended for the music lover who values exclusive design just as much as authentic sound.

TEMPORARY
INTERIORS

COPENHAGEN

Creating authentic sound has been our passion for more than 80 years. Copenhagen weaves years of refined craftsmanship with contemporary lifestyle. With its light Nordic design, the loudspeaker plays elegantly together with the surroundings, while it fills your room with great sound from virtually any music source. Simple to use and portable, Copenhagen lets you create the atmosphere to suit your moment. It's pure enjoyment in every detail.

STOCKHOLM

—

Stockholm builds on the classic principles of Nordic design: High quality, timelessness, and simplicity. Developed through more than 80 years of refined craftsmanship, our Hi-Fi technology will fill your room with great sound from virtually any music source. The compact cabinet blends discretely with its surroundings, leaving the design of the room entirely up to you.

Stockholm is sound elegance.

THE DESIGN

—

The distinct characteristic of Vifa audio products is its Nordic design.

The Nordic design addresses complex issues and turns them into simple and desirable solutions. Keynotes are respect for materials, for details, and for the user.

A team of researchers, psychologists, and designers has taken Vifa all the way through the music listener's journey; from dreams and desires to realization. This approach has helped shape the products in terms of finish, ease of use, and integration into the home. Vifa is for anyone who values exclusive design just as much as great sound.

Vifa products are designed in cooperation with design-people, a Scandinavian team of design innovators.

SOUND

—

Creating authentic sound is a matter of orchestration. It's the art of making the finest components and technology play together. Only human talent and experience, the love of music, and an uncompromising attitude to quality can make this happen.

This is our philosophy and the reason why you will be thrilled by the Vifa sound; a sound that is true to your favorite pieces of music, both for peaceful moments and for celebration.

MATERIALS

—

The Nordic design of Vifa audio products is reflected in their shapes and in the choice of materials. Contrasts interplay with each other; the warm, rough 'look and feel' of the textile against the cool, smooth aluminum frame on Copenhagen - and Stockholm's special-designed, hand-sized remote control cast in smooth, solid zinc. The discretely embossed logo complements the understated look of Vifa audio products.

Europe's leading manufacturer of design textiles, Kvadrat, has produced the special-woven textile covers. Kvadrat's sense of quality and the longevity of their textiles match the Vifa brand perfectly.

A hand holding a textured, reddish-brown rectangular object against a solid reddish-brown background. The object has a fine, woven texture and a thin, dark red border. In the bottom right corner of the object, there are two small, faint red circular logos. The hand is wearing a dark red, textured knit sleeve.

COLORS

To highlight your experience, Vifa audio products comes in six selected colors. Each color has its own vibrant character, energetic, elegant or understated.

Choose the one you desire the most.

WIRELESS

—

Copenhagen and Stockholm are wireless for your comfort and freedom of integration into your home. They are compatible with virtually any mobile phone, tablet, PC/MAC, and TV through technologies such as Bluetooth aptX, Apple AirPlay, and dlna music streaming.

The products additionally supports Wi-Fi direct, allowing the use of Apple AirPlay outside your network range.

COPENHAGEN FEATURES

—

DESCRIPTION	Portable wireless loudspeaker
GENERAL SPECIFICATIONS	
Dimensions Height/Width/Depth	268 mm / 362 mm / 90 mm
Net weight	4.65 kg
Frame	One piece diecast aluminium
Enclosure	ABS reinforced
Grilles	Custommade Kvadrat textile
TECHNICAL FEATURES	
	Bluetooth aptX Wi-Fi direct Apple AirPlay Works with dlna DSP signal processing Lithium Ion battery Force Balanced Woofers Digital pure path amplifiers
DRIVER UNITS	
Tweeter	2 X 28 mm Vifa driver unit with soft dome and neodymium magnet
Midrange	2 X 50 mm Vifa driver unit with aluminium cone and neodymium magnet
Woofers	2 X 80 mm Vifa driver unit with flat sandwich cone and neodymium magnet. Mounted mechanically back to back in a force balanced configuration supported by 4 passive radiators
FREQUENCY RESPONSE	
	50hz - 20khz @ +/- 3 dB
INPUT VOLTAGE	
	100Volt - 240Volt 50/60 hz
MAX. RATED POWER CONSUMPTION	
	150 watt
STANDBY POWER CONSUMPTION	
	Less than 0.5 watt
OUTPUT	
	USB 5 volt / 2.1 A (plugged into the mains) 0.5 A (battery mode)
INPUTS	
	Bluetooth aptX Wi-Fi direct Wi-Fi networked Wired optical or analog (3.5 mm minijack) Wired USB (only iOS device at present)
